The digital pressure gauges DM01-500 is a precision devices fulfilling highest demands. That was developed especially for the process monitoring and calibration.

Outstanding measuring qualities and an intuitive operation characterise the DM01-500. The battery-powered digital pressure gauge can be used e.g. for controlling pressure courses or calibrating pressure transmitters.

The integrated data logger is able to record pressure and temperature values linearly and cyclically which can be analysed with software DAQ.
